

MUHAMMED SINAN ANEEFA

Full Stack Developer | Python | Django | React | JavaScript | AWS | HTML | CSS

sinanhaneef09@gmail.com | +91-9496595249 | Bangalore, India | linkedin.com/in/muhammed-sinan-aneefa-08bb61269 | github.com/sinananeeffa

PROFESSIONAL SUMMARY

Full Stack Developer and AI/ML Engineer with hands-on experience building end-to-end web applications and AI-powered systems. Skilled in Django, DRF, REST APIs, and React for full stack development, alongside Deep Learning, NLP, and Computer Vision using TensorFlow, PyTorch, and Scikit-learn. Proficient in PostgreSQL, MySQL, MongoDB, data preprocessing with NumPy and Pandas, and containerized deployment with Docker. Certified in AI and Generative AI, with a track record of delivering hackathon-winning projects with measurable impact.

PROFESSIONAL EXPERIENCE

Full Stack Intern - Emdata Networks Private Limited

April 2026 - Present

- Applied Python and Object-Oriented Programming to build and structure web applications, reinforcing core data structures, debugging, and unit testing practices used throughout AI/ML development.
- Built and consumed RESTful APIs using Django REST Framework, implementing CRUD operations and JWT-based authentication - directly transferable to serving and integrating ML models in production.
- Designed and queried relational databases in PostgreSQL and MySQL using Django ORM, gaining practical experience in data modeling, data cleaning, and pipeline fundamentals.
- Worked across the stack (Django, React with Hooks and Context API) to understand how backend logic, data, and interfaces connect, containerizing components with Docker and gaining exposure to AWS deployment and CI/CD pipelines.
- Practiced version control (Git/GitHub) and software development best practices throughout the development lifecycle.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, React Hooks, Context API, Responsive Web Design

Backend: Django, Django REST Framework, Flask, RESTful APIs, JWT Authentication, API Development

Databases: PostgreSQL, MySQL, MongoDB, Django ORM

Tools & DevOps: Git, GitHub, Docker, Postman, VS Code

Cloud & Deployment: AWS, CI/CD (GitHub Actions, Jenkins), Application Deployment

Core Concepts: Object-Oriented Programming, Data Structures & Algorithms, Authentication & Authorization, Database Design, Debugging, Unit Testing

AI, ML & Data Analysis: Machine Learning, Deep Learning, NLP, Computer Vision, TensorFlow, PyTorch, Scikit-learn, OpenCV, LangChain, Generative AI, RAG, NumPy, Pandas, Matplotlib, Seaborn, Power BI

Soft Skills: Problem-Solving, Communication, Team Collaboration

PROJECTS

LIYAURA - Luxury Wedding Fashion Rental Portal - Python | Django | MySQL/SQLite | JavaScript

- Developed a role-based rental platform with User, Owner, and Staff modules, including an interactive Owner Dashboard for products, bookings, inventory, customers, offers, and analytics.
- Implemented responsive UI with search, filters, notifications, modals, drawers, and motion effects; improved booking reliability using Django ORM transactions and `select_for_update()` for stock consistency.

Talkeasy - AI Language Learning Platform - Python, Django, Next.js, Tailwind CSS

- Built an advanced, AI-driven language learning platform with a Next.js frontend styled in Tailwind CSS, featuring personalized learning games, real-time pronunciation scoring, story narration, AI conversational practice, grammar correction, and document translation, backed by a Python/Django data layer.
- Integrated a 3D virtual assistant using Three.js for immersive TTS/STT interactions, including a "TraceIt" module for AI-assisted alphabet tracing with adaptive difficulty.

Virtual Nurse Assistant - Major Project - Present

- An AI-powered virtual healthcare assistant designed to be a patient's first point of contact at home: it guides users through symptom checking, provides preliminary AI-driven insights, and sends medication reminders for treatment consistency.
- Delivered through a 3D avatar built in Unity with real-time voice interaction using Speech Recognition, making healthcare guidance more approachable for users less comfortable with typing. Tech: Python, Unity, Speech Recognition, ML.

Labsense - AI Healthcare Report Analyzer

- Automated medical report extraction and data cleaning with OCR and NLP, applying feature extraction to generate health insights and hospital recommendations via map-based search. Tech: Python, OCR, NLP, Maps API.

ACHIEVEMENTS & CERTIFICATIONS

- Runner-Up, ISTE Hackathon 2025 - Built an AI regional language learning system using NLP, STT/TTS, and gamification, solving the official Microsoft problem statement.
- Hands-on AI for Real-World Applications - IIT Kharagpur & TCS iON (Top 10%), Jul-Oct 2024. Certified: Generative AI Professional & AI Foundations Associate (Oracle), Introduction to Modern AI (Cisco).

EDUCATION

B.E. in Artificial Intelligence and Machine Learning - Yenepoya Institute of Technology

10/2022 - 08/2026

CGPA: 8.29
